

## Tick bites in Humans

### Description

Anyone can be affected by a tick bite. However, people who spend a lot of time outdoors in summer or in tall grass, are particularly at risk. Tick bites are quite common but are also something to not underestimate, as ticks can transmit diseases through their bites.

#### Step 1:

Basic therapy according to energetic state

#### Step 2:

Program 970.5 Toxin elimination

#### Step 3:
